Education

BRAC University

Bachelor of Science in Computer Science

January 2019 – May 2024

Dhaka, Bangladesh

Relevant Coursework

- Data Structures
- Algorithms
- Software Methodology
- OOP
- C-Sharp, Java, Python
- Database Management
- Data Science
- Internet Technology
- Image Processing
- Machine Learning

Experience

Authentic Simulation LLC

Senior Digital Developer - Remote

April 2025 – December 2025

Texas , US

- Served as Core Game Designer for Project Autozi Garage (Racing Simulator Developed in Unreal Engine) and awarded Valuable Team Member twice within an 8-month period.
- Worked as Director of Talent Development to enhance team communication, optimizing workflows for effective output and fast delivery.
- Worked closely with professional racers to analyze lap data and integrate findings into game-ready 3D models.
- Extended Unreal Engine Chaos Physics features and developed custom Unreal Engine plugins combining Blueprints and C++.
- Developing and optimizing game mechanics and features using Unity and C#.
- Collaborating with Level Designers and artists to implement gameplay elements and improve user experience of Alpha Version of Project.
- Enhancing and fine-tuning the car controller system for realistic physics and vehicle dynamics by Source Code Modification.
- Integrating UI elements and features through Game Programming to create a polished game experience.
- Managing Teamwork and Co-ordination between Developers Using Atlassian Tools and Github Version Control Precisely for Work Efficiency.

Inception Gaming Studio

Junior Game Developer Intern

October 2024 – February 2025

Dhaka , BD

- Developing Project Dhanmondi and optimizing vehicle mechanics and features using Unity and C# and Learned In Depth Game Designing by professionals.
- Collaborating with Level Designer and artist to implement gameplay elements and improve user experience of Alpha Version of Project.
- Enhancing and fine-tuning the car controller system for realistic physics and vehicle dynamics by Source Code Modification.
- Integrating UI elements and features through Game Programming to create a polished game experience.
- Streamlined developer coordination and task tracking by integrating Atlassian tools with GitHub version control to boost delivery efficiency and code review turnaround times.
- Supported early-stage operations for *Project Dhanmondi Unity Showcase*, coordinating investor meeting logistics, preparing pitch materials, and aligning technical updates with stakeholder expectations.

Robotics Club of BRAC University (ROBU)

Secretary of IT Department

2020 – 2022

Dhaka, Bangladesh

- Explored fundamentals of UI/UX development and system analysis to optimize departmental workflows and projects.
- Pioneered sound engineering initiatives within the club to expand technical capabilities and event production.
- Curated and led a masterclass on cinematography and sound engineering, fostering innovation and technical skill-sharing.

Projects

Mallaorie Park Race Track Simulation | *Python, Unity*

January 2025

- **Telemetry Pipeline Filtering:** Engineered an automated data ingestion pipeline in Python (‘pandas’, ‘scipy’) to process raw spatial tracking logs and apply Savitzky-Golay filtering to reduce high-frequency coordinate noise.
- **3D Trajectory Reconstruction:** Standardized variable height offsets across time-series logs to reconstruct continuous 3D spatial trajectories and normalize spatial tracking paths.
- **Kinematic Visual Analytics:** Built dynamic 3D spatial visualizations using ‘matplotlib’ to evaluate smoothed vehicle trajectories, analyze spatial motion patterns, and verify track geometry.
- **Data Pipeline Standardization:** Managed end-to-end string parsing and dataset restructuring workflows to output standardized, cleaned time-series data optimized for downstream machine learning tasks.

Phonebook Winform Desktop Application | *Winform Application, Visual Studio*

June 2024

- Developed a CRUD application for Windows using C# programming language and Microsoft Visual Studio.
- Integrated the MySQL Database to fetch information about customers and lists.
- Designed a user-friendly interface with appropriate layouts, views, and widgets to present customer data effectively.

Customized Arcade Car Controller | *Unity 3D, Visual Studio*

December 2024

- Developed a realistic car controller in Unity with advanced physics, game mechanics, core game mechanics, and advanced features.
- Optimized vehicle handling and performance, ensuring smooth gameplay and responsive controls.

Technical Skills

Languages: Java, C++, C#, Python, SQL

Developer Tools: VS Code, Microsoft Visual Studio, Git, Jupyter Notebook, Unity3D , Unreal Engine , Blender Basic Technologies/Frameworks: WinForms, PyTorch, Google Colab, Data Science

Libraries: NumPy, Pandas, Matplotlib, OpenCV, TensorFlow, Scikit-Learn

Certifications

Ensemble Methods with Decision Trees in Python

Completed

DataCamp

- Learned to train decision trees and ensemble models using Python and scikit-learn for classification and regression tasks.
- Developed an understanding of the advantages and limitations of decision trees, especially regarding overfitting and noise memorization.
- Gained proficiency in using ensemble methods to reduce overfitting and improve model performance on real-world datasets.
- Tuned influential hyperparameters for optimal performance of tree-based models.

Clustering with SciPy in Python

Completed

DataCamp

- Introduced to unsupervised learning, focusing on clustering techniques using the SciPy library in Python.
- Learned to preprocess data for clustering and applied hierarchical and k-means clustering algorithms.
- Explored player statistics from FIFA 18, analyzing clusters formed and visualizing results.
- Gained proficiency in quickly applying various clustering algorithms and interpreting clustering outcomes.

Data Visualization with Tableau

Completed

DataCamp

- Mastered the core principles of data visualization and developed skills in transforming data into impactful visual insights using Tableau.
- Applied best practices for designing interactive and appealing dashboards, enhancing stakeholder communication.
- Learned to visualize spatial data, create advanced charts like Waffle charts, DNA charts, and Sankey diagrams, and render information in meaningful ways.
- Worked with real-world datasets such as IMDB Movies and Airbnb data to build insightful visualizations.

Achievements

Robotics Club of BRAC University | *Sound Engineering, Videography*

2022

- Introduced a Sound Engineering Masterclass in the Workshop.
- Taught a foundational course on videography and sound engineering, building technical skills among students.

Beatbox Bangladesh | *Professional Beatboxer*

2017 – Present

- Achieved 7 national ranks in Beatbox Bangladesh, showcasing high-level performance and originality.
- Groomed aspiring beatbox artists, contributing to the growth of the beatboxing community in Bangladesh.
- Participated in and experienced various adventures in the beatboxing scene, maintaining a unique style and presence.
